Art Unit: 2834

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1, 3, 4, 6 and 7 are rejected under 35 U.S.C. 102(a) as being clearly anticipated by Nilsson, Higgins, Schafft (552), Corwin or Kolm.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 2, 5 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Corwin or Kolm in view of Lazarus, Stein or Schafft (815).

The reasons for rejection remain as specifically set forth in paper no. 7 (7-27-98).

Regarding applicants remarks it is noted that the method of manufacturing an article is not German to the patentability of the article itself. Thus, "having a prestress induced by heating and subsequently cooling the layered structure" has not been considered as a structural limitation and has not been given patentable weight. Since the layers of materials used by each of Nilsson, Higgins, Schafft (552), Corwin and Kolm are each different materials, they would obviously have different coefficients of thermal expansion.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
